Linear In-line Actuator

Intelligent actuators with integrated controller (icon) enable the use of MODBUS RTU on an RS485 serial communication. One of the industry's most powerful standards.

The icon options provide everything from easy maintenance, control and installation, to a wide range of customizable settings and feedback that will help tailor the movement solution to your specific needs and application.

Standard Specifications

- Temperature** ■ Operation: - 20 °C to + 70 °C ■ Storage: - 40 °C to + 70 °C
- Cable specification** Ø4,8 mm cable for icon35 (2 x AWG22 + 6 x AWG28), also available for HE version
Ø6,8 mm cable for icon50/60 (2 x AWG16 + 6 x AWG26), also available for HE version
- Bending Radius** 15 x cable diameter

Cable length for icon with 12 VDC motor is limited to 5 m, 24 VDC motor is limited to 9 m. The IP classification covers the actuator including cable and cable gland. Connector (if mounted) or open ends are not part of the certification

For other mechanical data please refer to Concens standard con35/50/60 datasheet.

Features

- Adjustable start/stop ramp
- Adjustable current limit
- Industrial interface MODBUS RTU on RS485
- Internal stroke limitation
- Internal temperature protection
- Plug & Play solution with conXion box, Box+ and conXion DIN.

Dimensions

Same BID (Build in Dimension) as con35/50/60 with Hall. Please see original datasheet for con35/50/60

Use of 'safe zone' will inevitably decrease the usable part of the stroke length of the actuator.

Recommendations and warnings

- Always connect icons to a power supply that matches the nominal voltage of the icon, also during update and parameter setting.
- Most switches are active low and to be pulled down to GND (Signal GND) for activation.
